

TANDBERG SOLUTIONS

TANDBERG FIELDVIEW™

Real-Time Mobile Video Collaboration

MAXIMIZE EFFECTIVENESS OF EXPERTS

Organizational experts are becoming more and more in demand. How do you best maximize their time? How can they be in two, three, even four places at once? The solution — bring the problem to the expert, not the other way around.

MOBILE VIDEO SCALES EXPERTISE

Mobile video enables real-time collaboration between experts in the office and personnel at the scene. By centralizing expertise and deploying mobile video in the field, experts now have the ability to scale their knowledge to colleagues across the globe and address critical issues that need to be reviewed on a real-time basis.

TANDBERG FIELDVIEW™

TANDBERG FieldView™ delivers the most innovative solution in mobile video collaboration. Featuring integrated wireless LAN, high resolution video and audio and the ability to collaborate via instant on-screen annotation — it's the next best thing to having your experts on the scene. Its ability to access small spaces enables productivity in areas previously inaccessible by video, allowing organizations to address and resolve issues instantly. Recording capabilities enable device and PC users to archive material for a later date or collaborate over previously recorded material. All content can also be extended to an office-based video meeting using a PC with the FieldView application and H.239 dual stream capabilities.

MULTIPLE INDUSTRY APPLICATIONS AND BENEFITS

FieldView increases the productivity and effectiveness of experts, enabling smarter, safer decisions across a wide variety of vertical markets. From manufacturing to research and development to education to first responders, its applications are only limited by imagination and where your feet can take you. FieldView provides significant ROI, increasing the quality and speed of decision making, while reducing travel expenses, time-to-market and downtime in operations.
